

KCHXXXX

Shelves for START & GRID racks, height 158-280 / 278-520

UNIK

- ✓ Maximum strength thanks to 2 mm steel structure
- ✓ High adaptability in size (600, 800, and 1000 mm) and height (158 up to 520 mm)
- ✓ Quick and intuitive installation.

PURPOSE

Unikkern rack shelves are designed to provide reliable, adaptable, and easy-to-implement support for all 19-inch installations. Compatible with 600 mm or 800 mm wide racks, they are an ideal solution for supporting servers, UPS systems, or heavy equipment within racks.

Made of 2 mm steel and coated with black epoxy finish (RAL 9005), they ensure excellent mechanical strength and long-term durability, even in demanding technical environments.

Thanks to their modular and height-adjustable design, these shelves adapt to various equipment depths (600, 800, or 1000 mm), ensuring optimal support while facilitating installation and maintenance. Their quick setup saves valuable time during data center deployments.

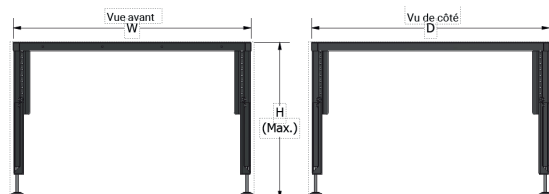

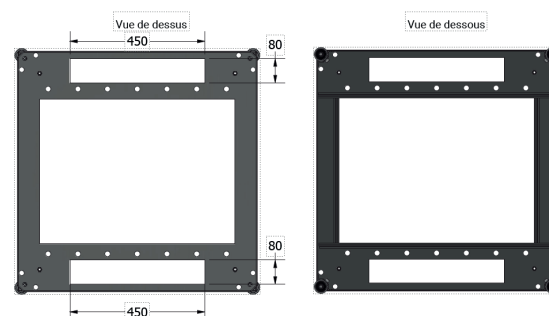

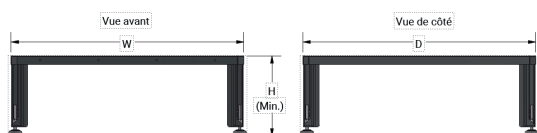

Robust, practical, and compatible with all Unikkern rack configurations, these rack shelves are essential for securing critical equipment while ensuring integration flexibility and efficiency.
