Wall-mounted cabinet 19 inches IP55

UNIK

- ✓ Excellent resistance to dust and water splashes
- ✓ Galvanized front and rear 19-inch rails
- ✓ Suitable for outdoor installations
- ✓ Passive ventilation
- ✓ High load capacity: 200 kg
- ✓ Compliant with IEC/EN 60529

THE PURPOSE

The Unikkern IP55 wall-mounted cabinet is designed to meet the demands of environments requiring enhanced protection while ensuring performance, security, and aesthetics. Ideal for outdoor installations or harsh environments, this waterproof cabinet combines robustness, elegance, and ease of integration.

Its 1.2 mm steel structure and IP55 protection rating enable it to resist dust and moisture, offering optimal protection for your active and passive equipment, even in the most demanding environments. This cabinet supports up to 200 kg, ensuring the stability of your critical equipment.

The front door, equipped with butterfly Lock, ensures secure access while allowing direct visibility of the components thanks to its glass design. The brush cable entry at the top facilitates cable routing while minimizing dust accumulation, helping preserve your equipment.

Its grey epoxy powder finish (RAL 7035) provides a neat appearance, allowing it to fit seamlessly into any professional environment, both indoor and outdoor.

Removable side and rear panels, combined with 19" mounting rails and integrated ventilation, allow quick installation and easy maintenance access while ensuring optimal airflow to maintain equipment performance.

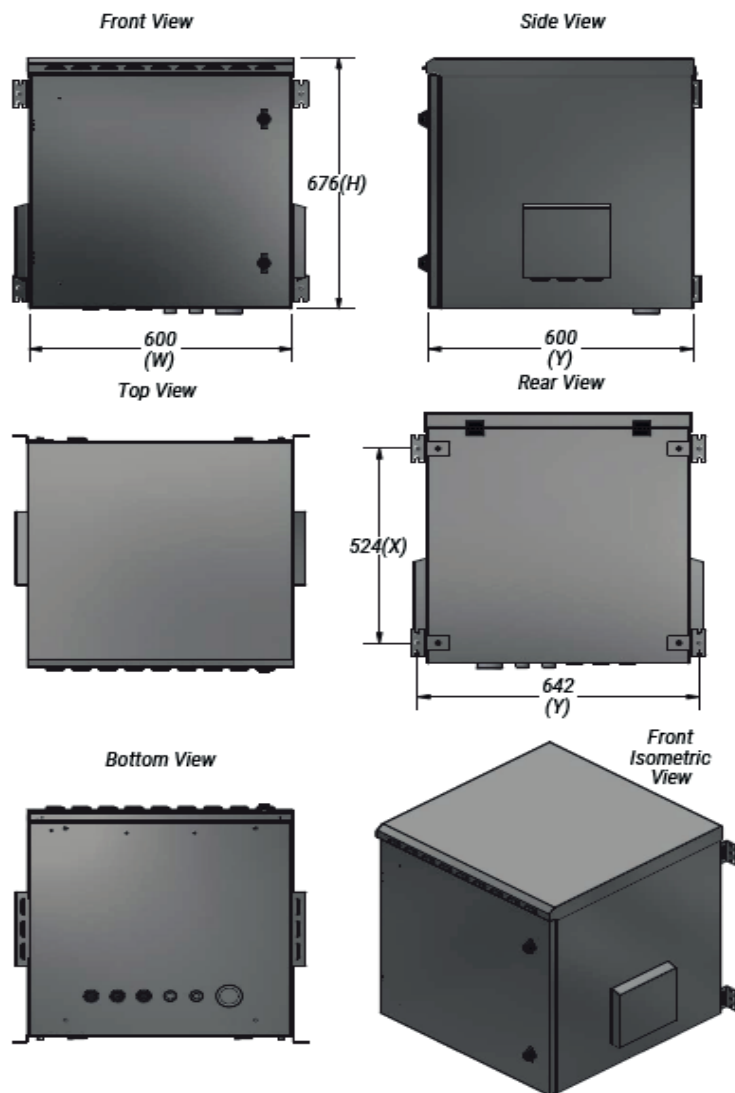

Available in several heights (from 7U to 20U), the Unikkern IP55 cabinet perfectly adapts to space constraints while ensuring efficient cable and component management, and meeting protection and safety requirements.
